Technology Fee Policy

(Approved by the Provost and VP-Finance, September, 2017; effective immediately; *Replaces existing Technology Fee policy*)

The Technology Fee is charged each semester to all registrants. This charge is reversed for registrants who drop all of their courses by the add/drop deadline. This fee supports student learning and educational opportunities at CIIS. As at most institutions of higher education, supplemental funding is necessary for CIIS to adequately support technology operations, support, and training. Some of this is apparent – the computer labs, the website, MyCIIS, Canvas, wireless access, library materials, and online courses – but the bulk of it is behind-the-scenes in the form of staffing, equipment, software, licenses, servers, firewalls, back-ups, and upgrades. Technology evolves rapidly and increasingly undergirds most pedagogical and administrative processes. CIIS seeks to continually stay abreast of current standards and to maintain efficient and effective technological resources.
