Reawakening the Wild Heart of Wonder:
Ecopsychology and Expressive Arts
as Pathways towards Transformation and Healing.

A 40-hour Expressive Arts Certificate Program.
30 CEUs available for California MFT and LCSW license holders.
This course is intended for clinicians, healing arts practitioners, educators, artists and those who wish to re-embody earth-cherishing consciousness.
No prior art experience is necessary.

We will approach Ecopsychology as the marriage of Ecology and embodied Depth Psychology.

The Journey:
As participant, you will free and enliven your creative embodied rapport with nature, engaging in visual arts, movement, voice, enactment, guided imagery, clay- and nature arts. You will develop skills in guiding others in opening their senses, imagination, heart and mind to the living earth, our home and our relation, and to creatively enrich their journey towards holistic unfolding, transformation and healing.

Join us in the creative reawakening of the wild heart of Wonder, in a beautiful setting, surrounded by the sounds, colors, textures and fragrances of nature, of woodlands, shorelines and meadows.

Sophia Reinders PhD, MFT, REAT, is the founding director of the WisdomBody Institute. She is a body-oriented Jungian psychotherapist and Registered Expressive Arts Therapist, and a certified Iyengar yoga teacher.
Her offices are in San Francisco and Corte Madera (Marin County). (415) 931 - 9507
