Content and Subject

The thesis or dissertation is to be an independent scholarly contribution to knowledge and present research/analysis conducted by the student under the supervision of the thesis/dissertation committee chair. The student must be the sole author of the manuscript; a coauthored thesis or dissertation is not permitted. In addition, the dissertation should exhibit originality in the sense that it does not duplicate someone else's work.

The role and nature of theses and dissertations vary in the different academic disciplines. Each academic program at CIIS provides information on its expectations and requirements in its program handbook. Handbooks are on MyCIIS on each program's page under the "Academics" tab. Thesis and dissertation forms for students in the School of Consciousness and Transformation can be found under the "Registrar" tab of MyCIIS, in the Registrar's Office forms page; for students in the Clinical Psychology program, they can be found in that department's program page.

Use of Previously Published Material

The thesis or dissertation should not have been published previously in its entirety. A student may include previously published material in the thesis or dissertation with the approval of the program and the committee chair. When the inclusion of such material is permitted, several conditions apply:

- The published material must be the product of research conducted by the student while enrolled in the program, and must not have been used to obtain another degree.
- The published material must be logically and coherently integrated into the thesis or dissertation.
- Publication references for the published material must be included. In the case of coauthored material, written permission from all copyright owners must be obtained.
- Overall, *any* previously published material reproduced in the dissertation, including the author's own previously published work, must include permission from the copyright holder(s). A sample letter for obtaining copyright permission is on MyCIIS > "Academics" tab > Center for Writing and Scholarship > Handbooks for Technical Review and Dissertation Publication.

Alternative Multipaper Dissertation Format

In addition to the standard format for doctoral dissertations, the School of Consciousness and Transformation (SCT), at the option of each department/program, allows for the use of an alternative

format that consists of three peer-reviewed papers (two of which have been published; the other can be published or under review) as the main basis for the dissertation. This option is currently offered by the Department of Integral and Transpersonal Psychology, and the Department of Transformative Inquiry. Note: Students must obtain permission from the department and/or committee before pursuing this option, and an integrated, synthesized document must be created in lieu of the dissertation (i.e., students cannot simply submit the three articles; they must produce coherent integration of the three articles in a separate document that includes a comprehensive introduction and conclusion).

Dissertation Proposal Rubric

CIIS faculty in the School of Consciousness and Transformation have created a rubric for the evaluation of dissertation proposals. The rubric is used by dissertation committee members to determine when a proposal is ready for approval and to give feedback to the student. The rubric also serves to guide students in building their understanding of quality standards for dissertations and as an assessment tool for reviewing the quality of CIIS dissertation proposals. The rubric is on the form “Thesis/Dissertation Proposal Assessment,” which can be found on MyCIIS under the “Registrar” tab, on the Registrar’s Office Forms page.

Advancement to Candidacy

Advancing to candidacy requires successful completion of all course and comprehensive exam requirements, and the thesis or dissertation subject (i.e., the proposal) being approved by the student’s thesis/dissertation committee, the Human Research Review Committee if the research involves human subjects (see the “Human Research Review Committee Handbook” on the “Registrar’s Office Forms” page of MyCIIS), the student’s department/program chair, and the Provost. For PhD students, approval of the proposal is reported to the Registrar’s Office via submission of the “Thesis/Dissertation Proposal Assessment,” one from the chair and one from the external member, and the completed “Thesis/Dissertation Proposal Approval” form, which are filed following the committee formation paperwork (see the “Registrar’s Office Forms” page of MYCIIS). The Registrar’s Office then requests confirmation from the program that all other academic requirements have been fulfilled. Upon receiving this, they record the advancement to candidacy status on the student’s transcript and notify the student by letter and by email.

PhD students must register for Proposal Completion every Fall and Spring until they receive this notification. Summer registration is contingent on approval of the dissertation chair. (PsyD students may enroll in Dissertation Proposal Writing: see the program handbook.) For those PhD programs which require an initial proposal writing course, this must precede registering into Proposal Completion. If the student advances to candidacy after the semester’s add/drop deadline, the Registrar’s Office will drop the student from Proposal Completion and register them into Dissertation Seminar. This will not incur additional tuition or fee charges.

Each program has designated a maximum number of semesters in which their students may enroll in Proposal Completion. If exceeded, the student is placed on academic probation. (See the “Academic Probation” policies in the “Academic Policies” section.) These limits are:

- East-West Psychology—2
- Ecology, Spirituality, and Religion—3
- Human Sexuality—3
- Integral and Transpersonal Psychology—3
- Philosophy, Cosmology, and Consciousness—3

- Anthropology and Social Change—4
- Transformative Studies—4
- Women’s Spirituality—2

The Clinical Psychology program has designated a maximum of three semesters in which its students may enroll in Dissertation Proposal Writing.

After advancement to candidacy, PhD students must register for Thesis/Dissertation Seminar, and PsyD students must register for Dissertation Research. These registrations must occur every Fall and Spring semester until the oral defense. Summer registration is optional for PhD students, contingent on the approval of the dissertation chair. After defending, and the entire committee signs off on the dissertation, students must register for Registration Maintenance until the dissertation is published.

Committee Composition and Responsibilities

The dissertation committee (which determines the acceptability of the dissertation) must be verbally proposed via the student’s department when enrolling in Dissertation Proposal Completion. Once preliminary approval is granted, students file the forms noted above to contract the committee members officially for the project. The dissertation committee includes a committee chair, an internal committee member, and an external member. For details concerning faculty eligibility, please refer to the Dissertation Committee Policy below.

It is the responsibility of the student to:

- identify an appropriate topic;
- receive approval from the student’s department;
- ensure that faculty members with expertise in the topic are available and willing to serve as chair and as committee members;
- submit the required forms in a timely manner;
- maintain regular contact with the chair each semester;
- keep the chair informed of progress being made on the proposal or dissertation; and
- keep the chair informed of any difficulties encountered.

Dissertation Committee

The dissertation committee shall consist of at least three faculty members, two internal to CIIS and one from outside CIIS. All committee members are expected to be present at the dissertation defense, either in person or virtually.

Committee Chair

- One core or associated faculty member (assistant professor or higher) from the department awarding the degree or a core faculty member from another CIIS program. Associated faculty members are recommended (subject to the approval of the Provost) by the core faculty in the department awarding the degree to chair dissertation committees; associated faculty members are oriented to CIIS dissertation expectations by the department.
- Holds a PhD or its equivalent.
- Has expertise in the topic.

It is the responsibility of the dissertation committee chair to:

- Guide the candidate at all stages of the project, including formulating the proposal, carrying out the research, and writing the dissertation.
- Supervise student progress.
- Ensure that all committee members have reviewed the dissertation and that substantive objections are resolved prior to the defense.
- Ensure that the dissertation meets academic standards.

The chair is expected to be in contact with the student at least once each semester, even if the student has not initiated contact.

Internal Committee Member

- A core, associated, or adjunct faculty member (assistant professor or higher) from the department awarding the degree or a core faculty member from another CIIS program.
- Holds a PhD or its equivalent.
- Has expertise in the topic.

It is the responsibility of the internal committee member to ensure the quality of the research and to do the following:

- Provide special expertise in areas needed to give a comprehensive appraisal of the project.
- Provide broader representation from the faculty in the candidate's field.
- Provide critical reading of the drafts of the proposal and dissertation.

External Committee Member

- A faculty member with a regular academic appointment (assistant professor or higher) in another institution of higher education or a nonfaculty member who is a recognized authority in the appropriate field(s).
- Holds a PhD or other relevant degree or has demonstrable qualifications that establish expertise.

It is the responsibility of the external member to do the following:

- Play a role in terms of maintenance of standards of quality.
- Verify that the level of research is appropriate to the student's degree objective.
- Provide the "outside" point of view.
- Share expertise that might not otherwise be available.

The student is responsible for giving the outside member the "External Member Packet." A copy of the proposed external member's vita must be submitted with the approval forms, along with a W9 tax form (or W8BEN for non-U.S. residents, if they have not worked with CIIS in the recent past).

Time Limits

See "Maximum Time Limits to Degree Completion" in the "Academic Policies" section.

Format and Language

Format

The thesis is typically a written manuscript. The dissertation is typically a written manuscript in book form. It may include other media (e.g., visual images, sound files) as supplements. Subject to advance written approval by the student's program and the Provost, alternative formats may be permitted. CIIS requires that the final product be a document that is professional in appearance and suitable for publication.

Language

Theses and dissertations must be written in English, although they may include references in other languages.

Technical Review

Theses and dissertations are required to contract a CIIS-approved technical reviewer to ensure that all style policy requirements are met and intellectual property concerns are properly addressed. After the defense and after any and all substantive and/or minor edits requested by the committee at the time of defense have been complete, the student must submit the manuscript to one of the approved technical reviewers (for a complete list, log in to MyCIIS > "Academics" tab > Center for Writing & Scholarship (left column) > Handbooks for Technical Review and Dissertation Publication.)

Technical review is not the same as copy editing or content editing; technical review focuses on the chosen style format and on formatting issues relevant to publication. After the technical review process is complete, the Center for Writing and Scholarship will review the manuscript for acceptance. The timeline for these final stages of the process can be found in the [CIIS Academic Calendar](#). Note: Be sure to choose the appropriate school and semester when viewing the CIIS Academic Calendar.

Technical reviewers are not employees of CIIS; they work collaboratively with the Center for Writing and Scholarship as independent contractors. Students are responsible for ascertaining in advance the extent of editing to be provided, how long the review is expected to take, what costs will be incurred (note: CIIS does not pay for technical review), and other contractual arrangements for the technical review services. CIIS ensures full payment to technical editors for services rendered by withholding final degree conferral until these financial obligations are met and the Center for Writing and Scholarship confirms their completion.

Note that technical review time and costs vary widely, depending on factors such as the length of the dissertation, the inclusion of tables and figures, and the degree to which the student has already incorporated and mastered style guidelines. Please review the CWS MYCIIS page in the section "Handbooks for Technical Review and Dissertation Publication" for further information, and contact the Center for Writing and Scholarship with any questions.

Style Policy**CIIS Requirements**

The margin settings, title page, signature page of the thesis or dissertation, and citation formatting must meet CIIS requirements. Students who submit pages that do not meet these requirements will be asked to reformat the pages. Sample pages and formatting guides are available on the Center for Writing and Scholarship's MyCIIS page.

It is at the discretion of the programs to require or suggest their own professionally acceptable style: APA, Chicago, or MLA. Students are advised to consult with their committee chair regarding the acceptable style and familiarize themselves thoroughly with it before they begin to prepare their manuscript.

There are a number of formatting points on which CIIS's citation requirements deviate from APA, Chicago, and MLA. Please read the CIIS formatting guidelines for your particular citation style and use these guidelines to format your dissertation correctly. Formatting guidelines can be found as follows: Log in to MyCIIS > "Academics" tab > Center for Writing & Scholarship (left column) > [Handbooks for Technical Review and Dissertation Publication](#).

Margin Settings

To ensure that no part of the manuscript is cut off when it is bound by the Laurance S. Rockefeller Library, CIIS requires standardized margins on every page of the manuscript. The side margins must be 1.5 inches from the edge. The top and bottom margins must be between 1 inch and 1.5 inches from the edge; the margins are to be the same for top and bottom. The entire content on the page, including page numbers, must fall within the margins specified. The page number can be centered on the top or bottom of the page.

Title Page

Please pay special attention to the following features on the title page:

- Indicate your degree and program. Use only the official degree name. If in doubt, refer to the catalog or check with the Registrar's Office.
- Indicate the year of graduation.

Certificate of Approval Page

The Certificate of Approval with original signatures must be submitted to the Registrar's Office, where it resides in the student's file.

An unsigned copy of the Certificate of Approval page should be submitted with the original manuscript.

Format the Certificate of Approval according to the sample Certificate of Approval, provided within each Format Style file (APA, Chicago, or MLA); visit the Center for Writing and Scholarship's MyCIIS page for sample pages.

Please pay special attention to the following elements on the Certificate of Approval:

- Do not include title or heading on the signature page.
- Position the page number consistently with the page numbers in the rest of the manuscript.
- Include the following statement: "I certify that I have read [TITLE, exactly as it appears on the title page] by [student name], and that in my opinion this work meets the criteria for approving a dissertation submitted in partial fulfillment of the requirements for the [student degree and program] at California Institute of Integral Studies."
- Include only as many lines as there are committee members signing.
- Include committee members' names. For each committee member, include their legal name, academic degree, and program or school (if not CIIS).

- Customarily, the name of the chair is given first (and designated as chair), and the outside committee member is given last.
- Increase the right margin on this page to 2 inches.

Thesis/Dissertation Approval and Final Dissertation Defense

Submission of Completed Draft

Students expecting to graduate in a given semester should submit, after consultation with their chair, a complete final draft of the thesis/dissertation to all committee members no later than the first week of class in that semester. Students should expect a reading time of four weeks by faculty, including the external committee member. While individual chapters may have been separately reviewed, the entire document may undergo a more comprehensive review. It is often necessary to have more than one cycle of feedback and corrections/additions.

Dissertation Defense

When all committee members have read the dissertation and no major changes are required, the chair, in consultation with the committee, will determine whether or not the student is ready to defend. It is the responsibility of the chair to make this determination. Determining the readiness for the defense is based primarily on the satisfactory completion of the work. Students need to be prepared to register for an additional semester if the committee determines that the document is not ready to defend.

The final defense is an oral examination open to the public, during which the author of a thesis or dissertation demonstrates to their committee satisfactory command of all aspects of the work presented and other related subjects, if applicable. The defense is usually two hours in length. It may be scheduled on any workday, during both instructional and noninstructional periods. The student is responsible to orchestrate the scheduling of the defense with the committee and their department.

The student must submit the completed manuscript to the committee by the deadline set by CIIS, or no later than three weeks prior to the scheduled defense. The technical review is to be completed post-defense and after any necessary changes have been incorporated into the manuscript. For Thesis/Dissertation deadlines, including defense deadlines for each semester, please visit the Academic Calendar: <http://www.ciis.edu/academics/academic-calendar>.

Defense Requirements

Doctoral students must defend their dissertations; master's students may or may not need to defend their theses, depending on their program's requirements.

When the committee chair has deemed the thesis/dissertation ready to defend, the student is to arrange the defense's date and time with all committee members. The defense must take place at CIIS (students in distance programs are exempt from this requirement), although committee members may participate remotely via teleconference or online. The student submits the "Request for Oral Defense Announcement and Room Reservation" form at least three weeks prior to the defense to the program coordinator/manager of their department, who will reserve the room, make the necessary accommodations, and publicize the defense to the CIIS community.

Committee Participation

Physical presence of the committee chair at the defense is expected. In the event that an out-of-town committee member cannot come to CIIS, the committee chair may allow that member to attend via video conference or conference telephone call.

Approval of the Thesis or Dissertation

Committee members are required to indicate their approval or disapproval of the manuscript and the defense on the manuscript's signature page and the "Thesis/Dissertation Approval" form.

Below are the procedures for approving the thesis or dissertation, depending on the amount of revision the committee requires after the defense:

No Revisions Required: If there are no changes required by the committee, all committee members and the committee chair sign the Certificate of Approval. The chair completes the "Thesis/Dissertation Approval" form, and both the chair and the student sign the form. The chair submits the form and the manuscript to the program chair, who submits the signed form to the Registrar's Office and to the Center for Writing and Scholarship.

Minor Revisions Required: If minor changes are required, the committee members, but not the committee chair, sign the Certificate of Approval. The chair specifies the required changes on the "Thesis/Dissertation Approval" form, and both the chair and the student sign the form. The student has 30 days from the date of the defense to complete and submit the changes. Only after the required revisions have been completed and accepted does the chair sign the "Certificate of Approval" and forward it, the "Thesis/Dissertation Approval" form, and the manuscript to the program chair. If these revisions extend into the subsequent semester, the student must register in that semester.

Instead of registering for Thesis/Dissertation Seminar, the student is eligible, in this situation, to register for Registration Maintenance. See the "Registration Maintenance" part of the "Registration and Grading Policies" section for further information about this. If the student elects not to register for Registration Maintenance, they must register for Thesis/Dissertation Seminar.

Major Revisions Required: If there are one or more areas of significant revision required of the student, no one on the committee signs the Certificate of Approval. The chair specifies the required changes on the "Thesis/Dissertation Approval" form, and both the chair and the student sign the form. The form specifies whether the changes to the dissertation are remedial or nonremedial. If the revisions are remedial, the student may continue in the dissertation phase and may be asked to reapply for a second defense at a future time. If the changes required are nonremedial, the student may not apply to defend the same dissertation. Only after the required revisions have been completed and accepted do the chair and other committee members sign the "Certificate of Approval" and forward it, the "Thesis/Dissertation Approval" form, and the manuscript to the program chair.

Final Review and Approval

After theses and dissertations are approved by the student's committee members and program chair, and after the technical review is complete, final drafts are submitted by the student to the Center for Writing and Scholarship for final review and approval. Instructions about technical review and details regarding final review procedures may be found via MyCIIS: Log in to MyCIIS > "Academics" tab > Center for Writing & Scholarship (left column) > Handbooks for Technical Review and Dissertation Publication. Deadlines for each semester are specified in the Academic Calendar, located on the Class Schedule and at http://www.ciis.edu/Academics/Academic_Calendar.html.

Publication

Publication is optional for the thesis and required for the dissertation. Students publish through ProQuest/UMI. It is the student's responsibility to edit and prepare a final manuscript that meets CIIS format and publishing requirements.

ProQuest/UMI, as the publisher of record for U.S. dissertations and theses, archives these works. It also makes them available to academic institutions, scholars, and interested readers through publication of the citation and abstract in ProQuest Dissertations and Theses (online), Dissertation Abstracts International, and Master's Theses International, all of which are designed to provide maximum exposure for and accessibility to theses and dissertations.

Once your thesis or dissertation has received final approval from the Center for Writing and Scholarship, students are provided instructions for uploading the document to ProQuest/UMI for publication. There are two options for publishing with ProQuest/UMI (Open Access or Traditional). Please review these options prior to applying for graduation.

Copyright

For information on quotations, citations, and copyright, see <http://library.ciis.edu/information/handouts/quotations.asp>. For further information on copyright ownership for a thesis or dissertation, see <http://www.proquest.com/products-services/dissertations/submitted-dissertation-proquest.html> and <http://manoa.hawaii.edu/graduate/content/copyright-patent>.

Depending on their country of origin, students who are foreign nationals may be subject to certain restrictions when applying for a copyright in the United States. For more information, see <http://manoa.hawaii.edu/graduate/content/copyright-patent>.

ProQuest/UMI Copyright Registration Service

Students who publish their thesis or dissertation with ProQuest/UMI utilize that company's service to act as the students' agent to register their copyright to that work with the United States Copyright Office. If students wish to use some other means to secure copyright and publication rights to their work (e.g., Creative Commons), they will need to contact the Center for Writing and Scholarship, and work directly with ProQuest/UMI to verify copyright and to ascertain the latter's right of first publication of the work.
